

# WINTERIZE T@B 400 (2020)

13.

- With pump on, open outdoor shower **COLD**-water faucet until drained.
- Close faucet.

14.

- With pump on, step and hold the toilet flush pedal until no water is flushing.

15.

Repeat Steps 1 thru 5 until all are completely drained. It takes several tries.

16.

When the entire water system is completely drained, close the **HOT**-water heater bi-pass valve.

***This will ensure that antifreeze does not flow through the hot water tank.***

17.

Use square bit to access the water pump.

18.

Use square bit to access the water pump.

19.

Locate the water pump. Ours is behind the cabinet under the large refrigerator (opposite kitchen).

20.

Unscrew two square head screws to access the water pump.

21.

Remove the wood panel to access the water pump.
